PROFESSIONAL SUMMARY

Computer Science student at UT Arlington with hands-on experience building C applications, implementing algorithms, and solving performance problems in real codebases. Proficient in data structures, algorithms, and object-oriented programming, with a consistent record of writing clean, tested, and documented code.

EDUCATION

The University of Texas at Arlington Arlington, TX
Bachelor of Science, Computer Science. GPA: 3.094. *May 2028*

SKILLS

Programming Languages: C, Java
CS Fundamentals: Algorithms, Data Structures, Object-Oriented Programming
Software & Tools: VS Code, Manual Testing, Root-Cause Analysis
Operating Systems: Linux, Ubuntu, Windows

CERTIFICATIONS

- Google AI Essentials, Coursera

PROJECTS

Insertion Sort and Merge Sort

- Built a 176-line C application implementing insertion sort and merge sort in a single codebase, validated with 7 manual test cases scaling from 1,024 to over 2 million elements
- Implemented file I/O using a function-pointer approach to handle external input, enabling the program to process file data or run independently
- Identified and resolved performance bottlenecks causing multi-minute sort times on large inputs by optimizing the algorithm implementation for the specific program structure
- Drafted technical documentation and usage guides detailing algorithm flow, code structure, and testing procedures

BINGO Game

- Built a 326-line C application in VS Code using 8 functions and 4 libraries, applying manual testing and debugging to resolve edge-case issues in win-condition logic
- Engineered win-condition logic to scan each row, column, and diagonal, with the center cell designated as a free space
- Applied random number generation to populate the board and implemented rendering of 2D data horizontally on screen
- Created and maintained detailed test scripts, performed regression testing after feature updates, and logged bugs to support iterative improvements

EXPERIENCE

Camp Counselor Feb 2022 – Present
East Library and Recreation Center

- Coordinate daily program activities across a team of counselors, delegating responsibilities and adjusting plans in real time when equipment, staffing, or scheduling issues arise
- Troubleshoot unexpected problems involving participants, equipment, and activities, evaluating and implementing solutions under time pressure
- Adapt activity approaches in real time to meet varying participant needs and sustain group engagement
- De-escalate conflicts among youth with composure, independently assessing each situation and resolving it calmly

Youth Mentor (Huynh Truong) Feb 2022 – Present
Vietnamese Martyrs Parish

- Mentor children and peer volunteers through weekly check-ins, identifying individual challenges and tailoring support strategies to each person
- Coordinate peer volunteer responsibilities during community events, stepping in to resolve logistical issues as they emerge
- Collaborate with team members to review program materials and refine session structure and delivery based on feedback
- Serve as a available support for youth and fellow Huynh Truong volunteers, offering a listening ear or immediate hands-on assistance to those experiencing stress or difficulties
